O-ring	VITON/NBR
Stud	B7M/B8M/L7M/B16M
Nut	2HM/8M/7M/4M
Gasket	Flexible graphite+304/PTFE/304

Materials could be choosed according to customers' requirement & working condition.

Plug Valve Introduction

一、 Usage.

It is mainly used for storage and transportation of oil and gas in the chemical industry, metallurgy, paper making, food processing, shipbuilding and other industries, used to open or close, and with pneumatic and electrical devices can also achieve the long-distance operation, to ensure personal safety.

二、 Features.

- 1、 lockup device, manual operation, in order to prevent misoperation, valve can be equipped with padlock device.
- 2、 Anti-static structure, when a fire break out, the metal seal forms to prevent large leakage of media
- 3、 valve body and stem can finish emergency injection seal, through the grease injection valve, the stop-leak compound can achieve a short-time seal, theref or to buy time handling the scene.
